DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/14/08 has been entered.

Response to Remarks

Applicants' arguments, filed on 7/14/08, have been approved and entered. They have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-5 are rejected under 35 U.S.C. 102(a) as being anticipated by Alvarado et al.

Art Unit: 1637

Alvarado et al. discloses a method for synthesizing and purifying an oligonucleotide immobilized on a solid support complex comprising a polymer support comprising a long chain alkyl amine (LCMA), deoxyribonucleoside 3'phosphosramidite containing fmoc as a protecting group on the nucleotide base. Unreacted material is removed creating a purified oligonucleotide/polymer support complex. The purified complex is then treated with DBU which releases only the Fmoc and the oligonucleotides is immobilized on said support. (page 39, page 40 last paragraph – page 41).
